**39th Annual Survey Report on
State-Sponsored Student Financial Aid**

**2007-2008
Academic Year**

**National Association of State
Student Grant and Aid Programs**

About NASSGAP

The National Association of State Student Grant and Aid Programs (NASSGAP) is dedicated to the promotion, strengthening, encouragement, and enhancement of high standards in the administration and operation of student grant and aid programs so that these programs shall be available to students in all states to expand and further postsecondary educational opportunities. NASSGAP's membership is drawn from single agencies in each state or territory which are responsible for state-funded student aid programs.

NASSGAP serves as a forum for the development and exchange of information, ideas, policy positions, procedures, and needs for student financial assistance for the benefit of member agencies and other organizations. NASSGAP also acts as a collective voice of reasoned opinion before state, regional, and national councils with respect to student financial aid programs whose objective is the furtherance of postsecondary education in the United States, including grants, scholarships, loans, college work study, and other forms of government-sponsored assistance to students.

NASSGAP works with other associations, councils, and agencies to design, implement, and operate simplified student application procedures for student financial assistance and design a uniform method of determining the ability of the family to pay costs of postsecondary education. NASSGAP conducts research, publishes reports, holds conferences, and otherwise engages in activities which help existing student aid programs to become more responsive to federal, regional, and state public policy goals and objectives; encourages the development of new programs as the need arises; works toward the prevention and elimination of fraud and abuse in student financial aid programs; and, provides a forum for the development and exchange of information, ideas, policy positions, and procedures for student financial assistance for the benefit of member agencies and other organizations.

About this Report

Each year, NASSGAP completes a survey regarding state-funded expenditures for postsecondary student financial aid. This report, the 39th annual survey, represents data from academic year 2007-08. Please note row and column data in tables may not add to row and column table totals throughout the report due to rounding.

Electronic copies of this report, and reports from several previous years, are available in PDF format free of charge at www.nassgap.org. An online query tool that will allow for customized queries of survey data is available at www.nassgap.org (click on the Query Tool link). Comments, suggestions, or questions concerning this report may be directed to NASSGAP at 202.776.2599 or nassgapsurvey@nassgap.org.

Executive Summary

The economic and noneconomic benefits of higher education, both private and social are undeniable. The higher the average education level of the population, the better off people are. College is not for everyone, but college ought to be possible for anyone who wants to try and who has taken the steps to help themselves succeed. State-funded student financial aid makes college possible for millions of Americans.

This report provides data regarding state-funded expenditures for student financial aid and illustrates the importance of efforts made by the states to assist postsecondary students. Information in this report is based on academic year 2007-08 data from the 39th annual National Association of State Student Grant and Aid Programs (NASSGAP) survey.

Data Highlights

- In the 2007-2008 academic year, the states awarded about \$10 billion in total state funded student financial aid, an increase of about 7.2 percent in nominal terms from the \$9.3 billion in aid awarded in 2006-2007 and an increase of about 6.6 percent in constant dollar terms.
- The majority of state aid is in the form of grants. In 2007-2008, more than 3.9 million grant awards were made representing about \$8 billion in need and nonneed-based grant aid, an increase of about 5.3 percent from the \$7.6 billion in grants awarded in 2006-2007. Of the grant funds awarded in 2007-08, 73 percent was need-based and 27 percent was nonneed-based, almost the same percentage as seen in 2006-2007.
- Funding for undergraduate need-based grant aid increased \$436 million nationwide from about \$5.3 billion in 2006-2007 to more than \$5.7 billion in 2007-2008, an increase of more than 8 percent.
- Nine states (California, Illinois, Indiana, New Jersey, New York, North Carolina, Pennsylvania, Texas, and Washington) collectively awarded more than \$3.8 billion in undergraduate need-based grant aid, accounting for about 68 percent of all aid of this type.
- States provided more than \$1.9 billion in nongrant student aid, including loans, loan assumptions, conditional grants, work-study, and tuition waivers. Loans and tuition waivers accounted for 73 percent of nongrant funds awarded.

Forty-nine reporting entities identified state-funded undergraduate programs with awards based solely on need, while 27 identified programs which made awards based only on merit. Exclusively need-based aid constituted 48 percent of all aid to undergraduates, exclusively merit-based aid accounted for 19 percent, with the rest, 33 percent, accounted for by other programs and by programs with both need and merit components. The amount of undergraduate aid awarded in 2007-2008 through programs with a merit component increased to about \$2.76 billion. This compares to \$4.07 billion awarded to undergraduates through programs based only on need.

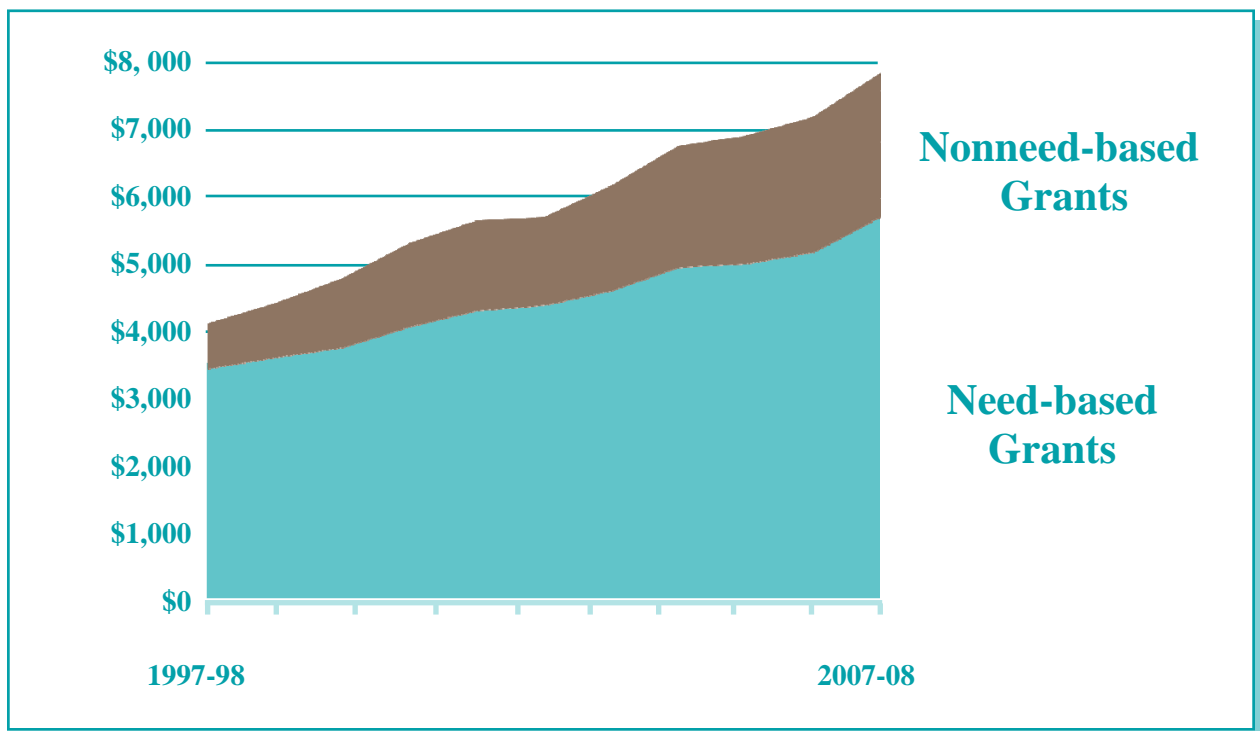

South Carolina, Washington DC, Georgia, and Tennessee provided the greatest amount of grant aid on a per capita basis and along with Kentucky and West Virginia were the largest providers of aid per capita for the population between ages 18 and 24. South Carolina, Georgia, Kentucky, New Jersey, and Tennessee provided the most undergraduate grant dollars compared to undergraduate full time equivalent enrollment. South Carolina, Vermont, Pennsylvania, Tennessee and Georgia had the highest proportion of total expenditures for state-funded grants compared to appropriations for higher education operating expenditures.

Constant dollars provide a method of comparing expenditures across years and adjusting for the effect of inflation. Constant dollars were calculated using the academic year correction of the Consumer Price Index, All Urban Consumers (CPI-U) from the U.S. Department of Labor, Bureau of Labor Statistics.

About the Survey

The 39th Annual NASSGAP survey was completed by each state in Winter and Spring of 2007-08. A PDF version of the survey instrument is available at:

www.nassgap.org/survey/NASSGAP_Survey_Instrument_2007-08.pdf

Terms used on the survey instrument include:

Federal LEAP (Leveraging Education Assistance Partnership) and SLEAP (Special Leveraging Education Assistance Partnership) funds are included in individual state figures. Primary need-based grant programs are designated by individual states.

Grant aid: Includes grants, scholarships and other such gift aid.

Need-based aid: Recipients must meet some standard of need using such measures as EFC, remaining costs, or maximum income to be eligible for an award.

Nonneed-based aid: Recipients are not required to demonstrate financial need to be eligible for an award.

Merit based aid: Recipients are selected in whole or in part on the basis of test score, performance, class rank, grade point average, or other such criteria of achievement.

Primary need-based grant program: The flagship need-based grant program in a state. For some states (California, Colorado, Florida, South Carolina), the primary need-based grant program may be a combination of several individual programs.

Tuition waiver program: Program mandated or funded by a state in which all or a portion of a recipient's tuition at an eligible institution is not charged to the award recipient.

Loan assumption or forgiveness program: Program in which a recipient has the possibility of having a loan repaid or forgiven, in whole or in part, in exchange for fulfilling certain service obligations.

Conditional grant or loan program: Recipient receives an award, which will become a loan if certain obligations are not met.

Special purpose program: Program with specific objectives usually targeted to specific groups of students. Examples include workforce development programs in which recipients train for particular occupations, such as teachers and health and technical workers; retraining programs aimed at retraining unemployed workers; post-service programs offering benefits to veterans or National Guard members; and, parent or spouse service programs providing benefits to spouses or children of persons killed or disabled during service to the National Guard, police, fire fighters, military, corrections system, or other occupations.
