**44th Annual Survey Report on  
State-Sponsored Student Financial Aid**

**2012-2013  
Academic Year**

**National Association of State  
Student Grant and Aid Programs**

## About NASSGAP and this Report

The National Association of State Student Grant and Aid Programs (NASSGAP) is dedicated to the promotion, strengthening, encouragement, and enhancement of high standards in the administration and operation of student grant and aid programs, in order that these programs be available to students in all states to expand and further their postsecondary educational opportunities.

NASSGAP serves as a forum for the development and exchange of information, ideas, policy positions, procedures, and needs for student financial assistance for the benefit of member agencies and other organizations. NASSGAP also acts as a collective voice of reasoned opinion before state, regional, and national councils with respect to student financial aid programs.

NASSGAP conducts research, publishes reports, holds conferences, and otherwise engages in activities which help existing student aid programs to become more responsive to federal, regional, and state public policy goals and objectives.

Each year, NASSGAP completes a survey regarding state-funded expenditures for postsecondary student financial aid. This report, the 44th annual survey, represents data from academic year 2012-13. Please note row and column data in the tables may not add to row and column table totals throughout the report due to rounding.

Comments, suggestions, or questions concerning this report may be directed to NASSGAP at 202.721.1186 or [nassgapsurvey@nassgap.org](mailto:nassgapsurvey@nassgap.org).

## Electronic Resources

NASSGAP's Web site is [www.nassgap.org](http://www.nassgap.org). The site has many elements of interest to student aid policymakers and researchers including links to state aid agency web sites. Electronic copies of this report, and reports from several previous years, are available in PDF format free of charge at the site.

An online query tool that will allow for customized queries of survey data is available at:  
[www.nassgap.org/customquery](http://www.nassgap.org/customquery)

A State Data Quick Check tool which shows expenditures by programs for a selected year is available at:

# Executive Summary

Why do states still even provide postsecondary student financial assistance? With bridges, roads, and other infrastructure crumbling around their ears, with the increased costs of providing medical services for poor and indigent citizens, and with the repercussions of spending decisions put off to a quickly arriving future day, it is amazing that state-funded college financial aid is still available. But it is. States provided \$11 billion in aid to students in 2012-13 academic year because state policy makers know educating their residents and investing in their human capital is important. Fixing bridges takes engineers and managers; providing medical services takes doctors, nurses, and technicians; and, sorting out how to manage the fallout of past decisions and move forward in difficult times takes educated people with postsecondary training. Why do states still even provide postsecondary student financial assistance? Because in the big picture, they can't afford not to.

This report provides data regarding state-funded expenditures for student financial aid and illustrates the extent of efforts made by the states to assist postsecondary students. Information in this report is based on academic year 2012-13 data from the 44th Annual NASSGAP survey.

## Data Highlights

- In the 2012-13 academic year, the states awarded about \$11.2 billion in total state funded student financial aid, an increase of about 1.3 percent in nominal terms, but a decrease of 0.6 percent in constant dollar terms from the \$11.1 billion in aid awarded in 2011-12.
- The majority of state aid (85 percent) remains in the form of grants. In 2012-13, almost 4.1 million grant awards were made representing about \$9.6 billion in need and nonneed-based grant aid. This represents an increase of about 2 percent from the \$9.4 billion in grants awarded in 2011-12. Of the grant money awarded in 2012-13, 75 percent was need-based (up slightly from last year) and 25 percent was nonneed-based.
- Funding for undergraduate need-based grant aid increased nationwide from about \$6.8 billion in 2011-12 to about \$7.0 billion in 2012-13, an increase of about 3 percent in nominal terms.
- Eight states (California, New York, Texas, Pennsylvania, Illinois, New Jersey, Washington, and North Carolina) collectively awarded about \$5 billion in undergraduate need-based grant aid, accounting for about 70 percent of all aid of this type.
- States provided about \$1.7 billion in nongrant student aid, including loans, loan assumptions, conditional grants, work-study, and tuition waivers, down almost 4 percent from last year. Loans and tuition waivers accounted for 76 percent of nongrant funds awarded.

Most states reported state-funded undergraduate programs with a need component, however, four states reported no need based aid programs. Twenty-six states identified undergraduate programs which made awards based only on merit. Exclusively need-based aid constituted 48 percent of all aid to undergraduates, exclusively merit-based aid accounted for 19 percent, with the rest, 33 percent, accounted for by other programs and by programs with both need and merit components. The amount of undergraduate aid awarded in 2012-13 through programs with a merit component remained level at about \$3.9 billion. This compares to \$4.9 billion awarded to undergraduates through programs based only on need.

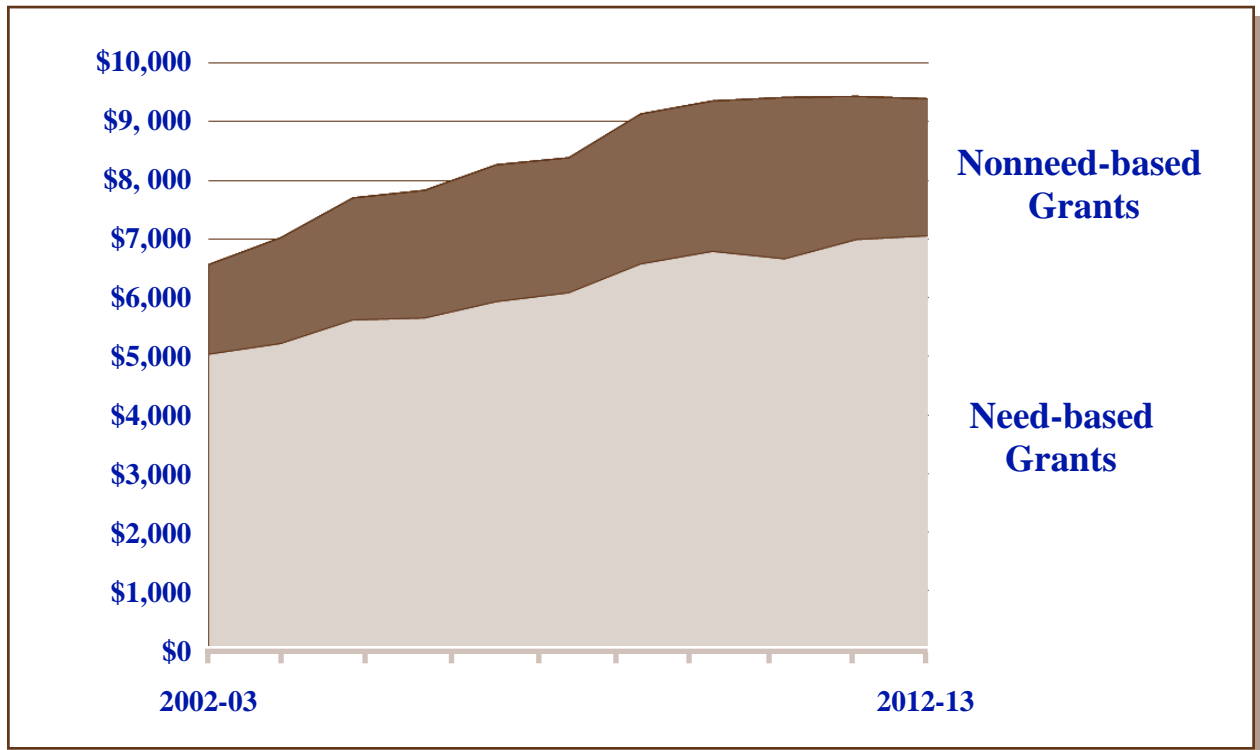

South Carolina, Tennessee, West Virginia and Georgia provided the greatest amount of grant aid on a per capita basis. South Carolina, Tennessee, and Georgia provided the most undergraduate grant dollars compared to undergraduate full time equivalent enrollment. South Carolina, Tennessee, Washington, Pennsylvania, and Vermont had the highest proportion of total expenditures for state-funded grants compared to State fiscal support for higher education.
